### Professional Experience

#### The Animal Eye Center of NJ

(October 2018 – August 2020)

Collecting patient's information while conducting routine ophthalmic tests including Schirmer tear test, fluorescein stain and tonometry. Performing additional diagnostics such as electroretinogram and ultrasounds. Preparing and monitoring anesthesia for all surgical procedures. Providing patient care by administering and filling medications, placing IV catheters, and collecting blood samples. Liaison for patient's family and doctor

- Created policies for surgical procedures and maintenance of surgical instruments
- Devised a policy for handling and addressing pandemic situations
- Designated trainer for new hires
- Restructured facility stock and surgery room to increase efficiency

#### Progressive Veterinary Care

(August 2017 – October 2018)

Addressed patient's needs for annual visits and emergencies. Kept patients up to date on vaccines, preventatives and dental cleanings. Monitored anesthesia for surgical and dental procedures. Performed radiographs, blood draws, catheter placements, and urine collection.

- Managed an open house for the public to increase business visibility and clientele
- Assisted sister hospital during peak times
- Developed and maintained a vaccine checklist
- Maintained quality control for all blood testing apparatuses

#### Animerge Emergency Facility

(October 2014 – August 2017)

Triaged patients, assessed their vitals and obtained medical history in a timely fashion. Provided medical treatment plans and medications for both inpatient and outpatient care. Assisted in sedation and general surgical procedures. Prepared surgery ward, cleaned and sterilized surgical instruments, in addition to general hospital maintenance. Observed and treated ICU patients

- Designated technician for controlled drug access
- Career growth from technician assistant to technician
- Adapted from college courses to hospital environment
